

IFS Cloud ERP for Construction

Design, construct and maintain on a single, configurable ERP platform that delivers total project financial control

The construction industry faces unique challenges: streamlining complex projects, overcoming the skilled labor gap, managing supply chain disruptions and raw materials price increases. The key to building a profitable and successful construction business is adopting a modern ERP digital backbone that manages complexity and improves business performance.

With the IFS Cloud ERP platform, you gain best-in-class project financial control by enabling users to operate from one source of truth. Construction-specific, out-of-the-box use case support enables your business to adopt best practice, standardized processes that empower all your teams to deliver high-quality work, efficiently.

Plan, optimize and deliver profitable, on-time projects with confidence

Improve profitability by optimizing resources and project finances

Gain project financial control that goes beyond accounting and simplifies reporting

Increase project performance, transparency, and cost control

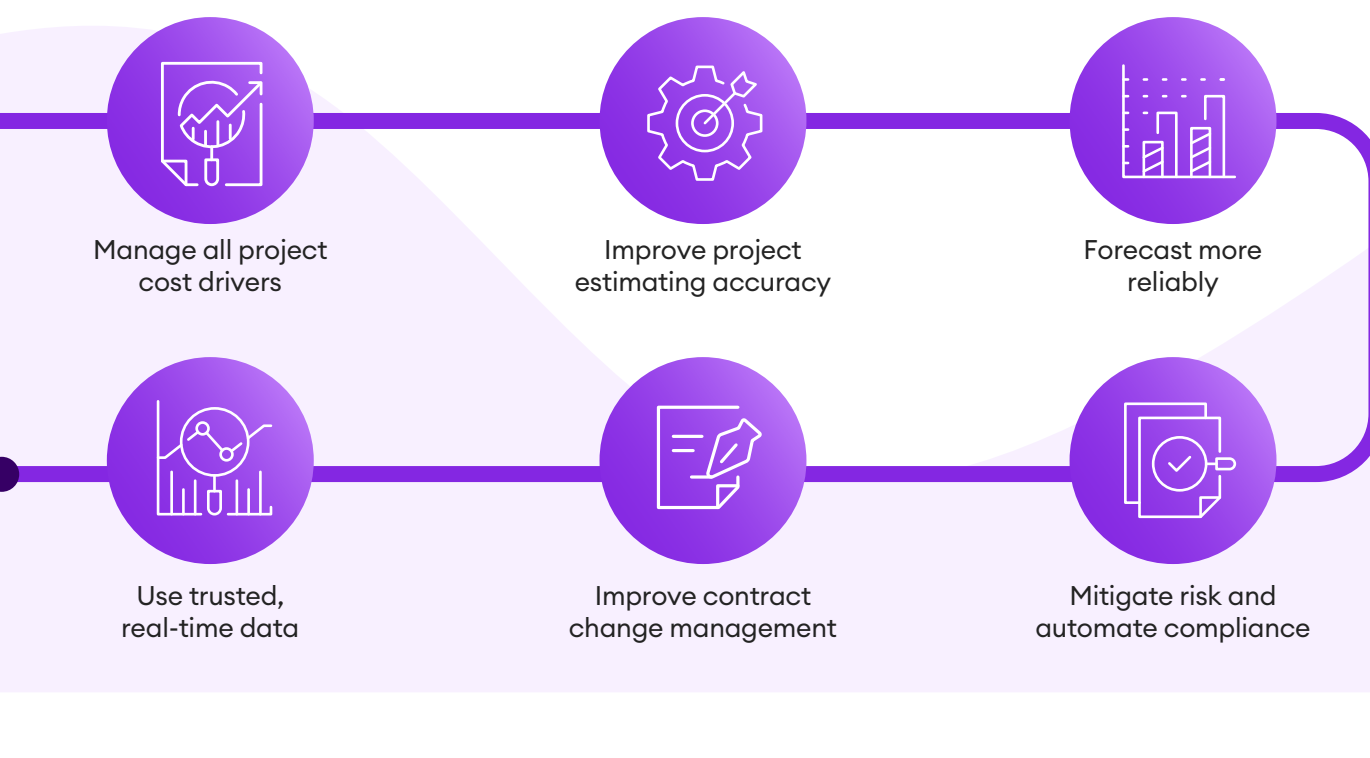

Seamlessly coordinate workers, subcontractors, materials, and equipment

IFS Cloud offers best practice support for all your core business processes:

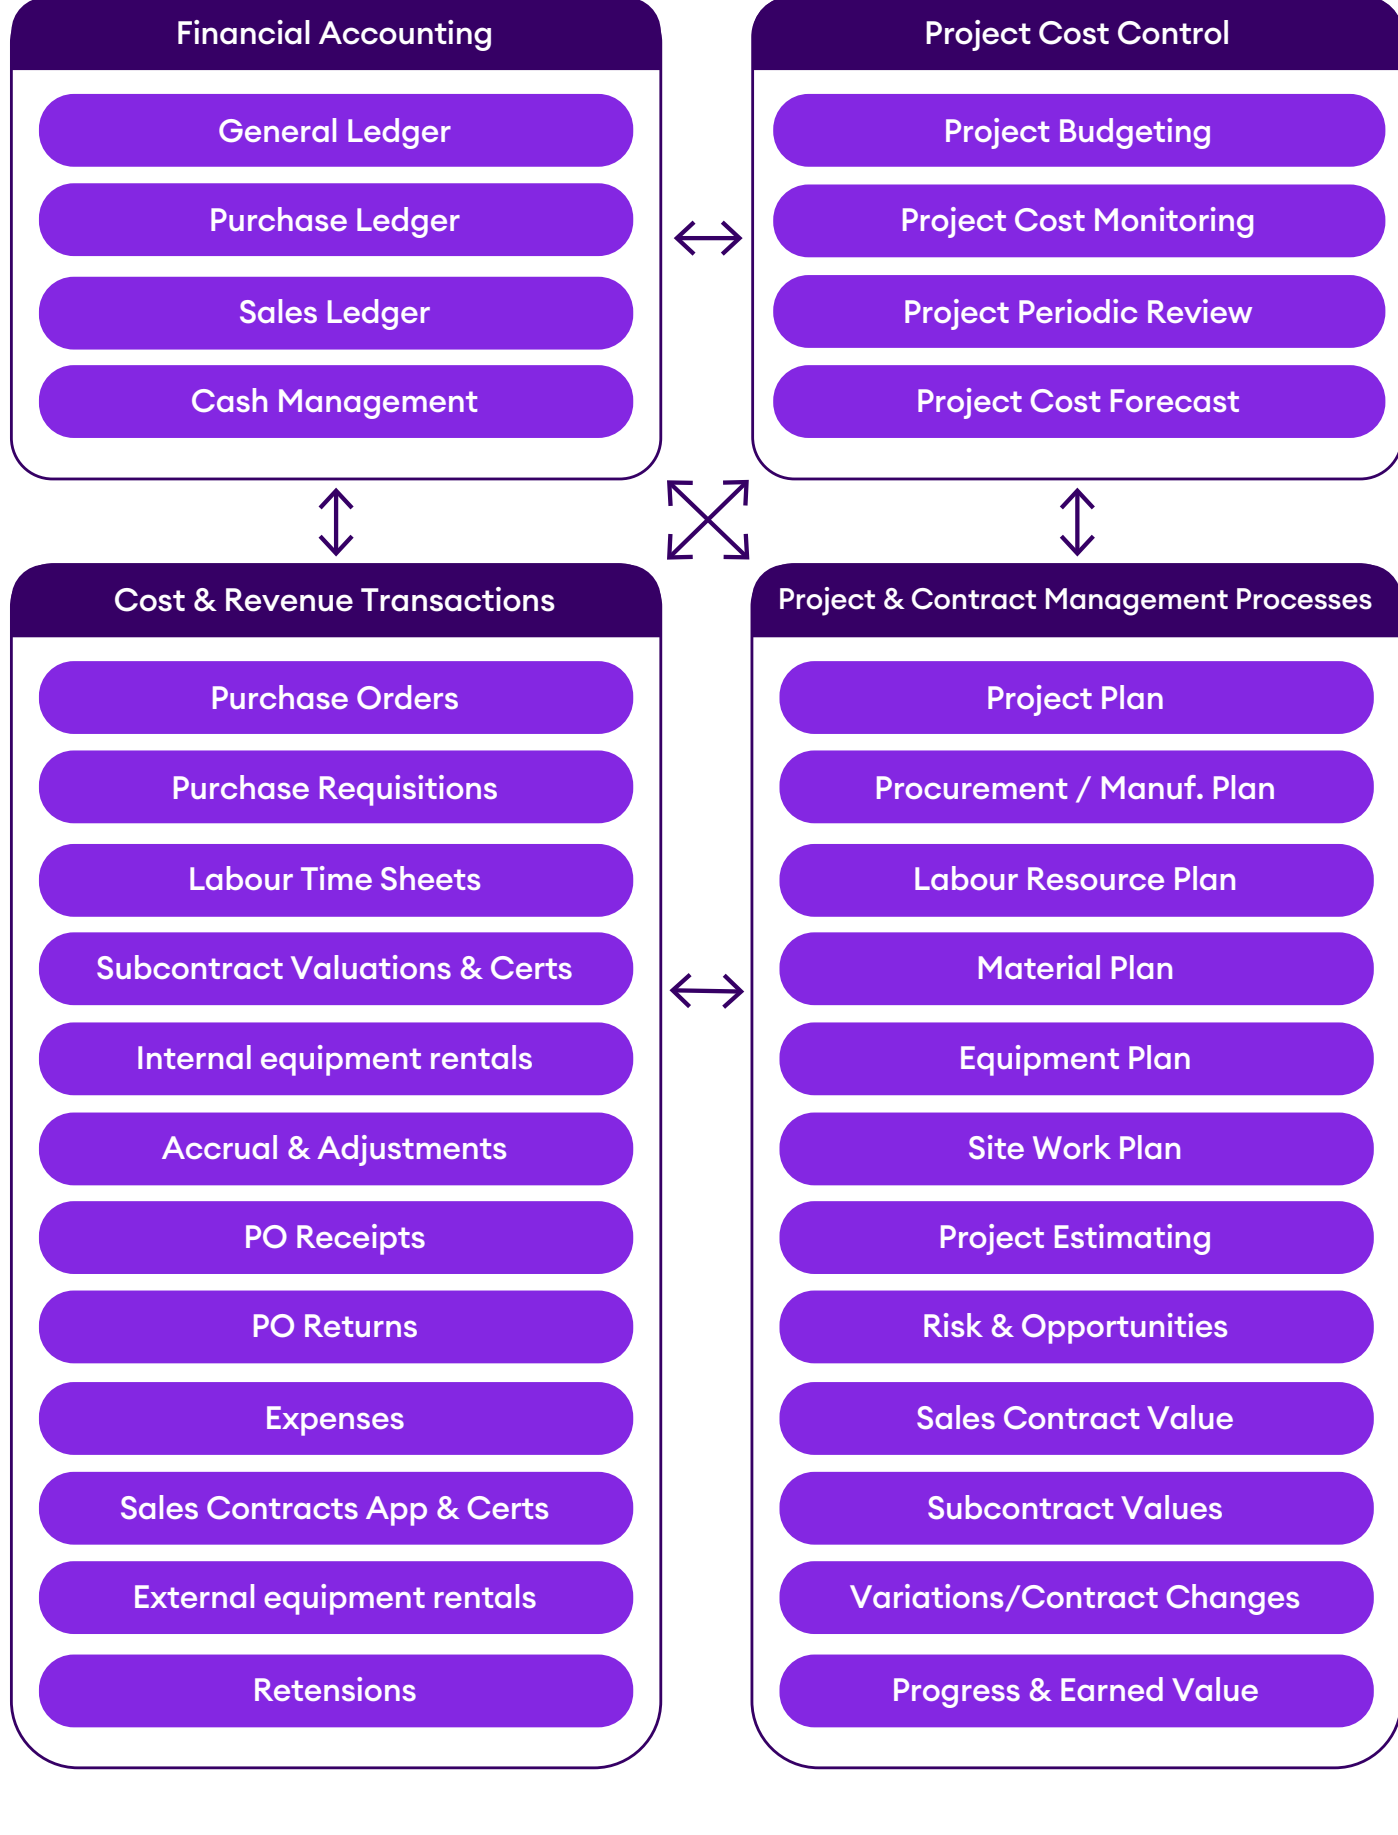

Maintain tight profit margins and manage the past, current, and future positions

Unlike most construction ERP solutions which only manage past performance and mid-project corrections to preserve margins, IFS Cloud is future-focused. Our composable solution with operational workflows results in accurate transactional information that allows faster decision-making based on real-time data and predictive outcomes.

IFS Cloud Delivers Truly Integrated Project Financial Control

IFS Cloud is a construction finance-centered ERP system that manages all elements which influence the current and future position of a project, including risks, cash, contract changes and forecasts to ensure your project margins remain on track.

Increase efficiency by adopting standardized processes across diverse operations

Reduce IT System Complexity with a Future-Proof Platform

Most companies are attempting to manage project financial control with a wide assortment of best-of-breed systems and hundreds of disconnected spreadsheets. In contrast, IFS Cloud provides a future-proof, digital ERP backbone that can readily integrate to a smaller number of existing systems thanks to an open API architecture. It offers evergreen updates that let you choose when to deploy new functionality.

IFS Cloud delivers:

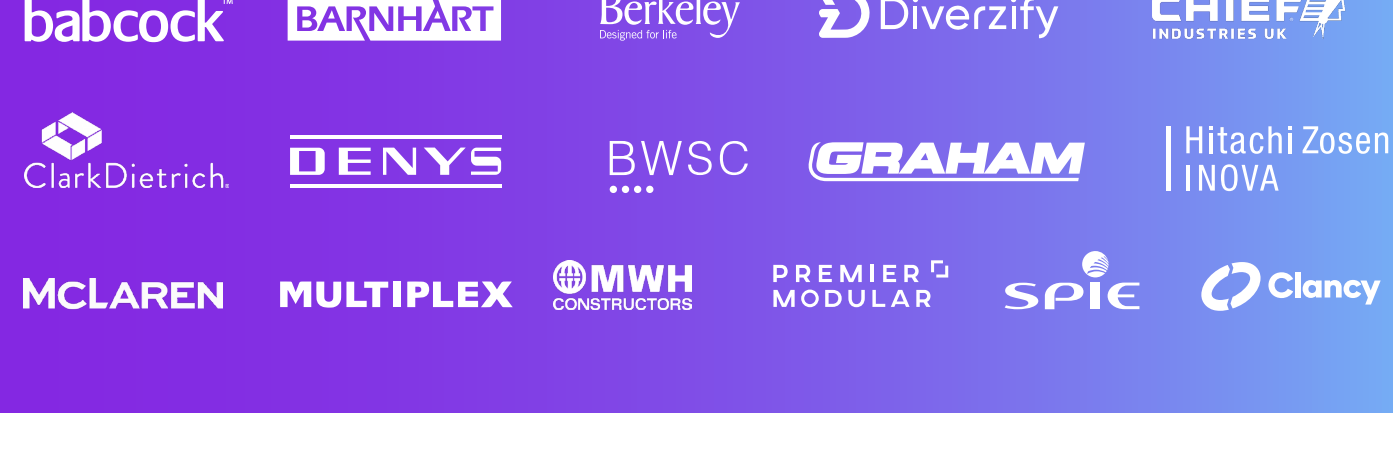

An integrated enterprise business system which provides accurate, reliable data

A modular nature that easily supports joint ventures and new business models

Flexibility to select the relevant modules that meet your needs

A digital platform to embrace new technologies (AI, Robotics, Automation)

Trusted by the world's best construction and engineering companies:

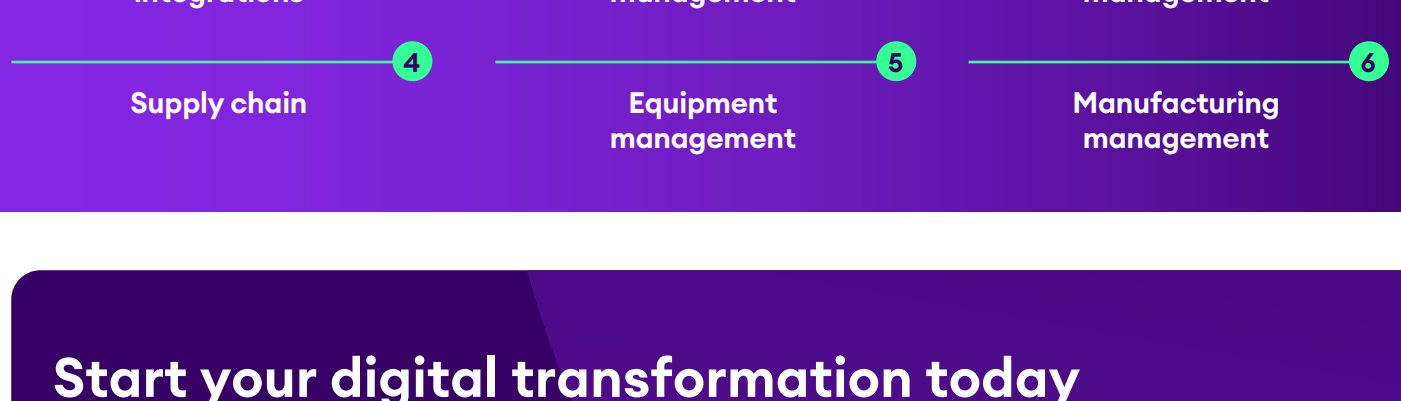

Analyst Recognition: IFS Cloud named "Best Construction ERP 2024 for Homebuilders"

"We are particularly impressed with IFS's open application programming interfaces (APIs), which makes it easy for construction companies to integrate the software that underpins their business."
